

**REMARKS**

With the addition of new claims 23 to 25, claims 12 to 25 are pending in the present application, since claims 1 to 11 were previously canceled. Claims 20 to 25 are withdrawn from consideration.

The Examiner requires restriction to one of the following inventions:

- I: claims 12 to 19 drawn to a method for a rollover stabilization of a vehicle, and further to (a) a single species of a steering variable, (b) a single species of a roll variable, and (c) a single species of a change as a function of the rollover tendency; and
- II: claims 20 to 22 drawn to a vehicle-dynamics control system for a rollover stabilization of a vehicle, and further to a single species of that which is ascertained as a function of the rollover tendency.

Accordingly, *Applicants elect without traverse Group I, and (a) a steering angle, (b) a roll rate, and (c) a change of a control threshold of a rollover-stabilization algorithm, which corresponds to claims 12 to 19, as presented.*

Applicants respectfully request an early and favorable action on the merits.

Respectfully submitted,  
KENYON & KENYON LLP
